

LaserNet Output Management ERP Application Connectivity

LaserNet Output Management ERP Application Connectivity

Application Connectivity

AutoFORM LaserNet Output Management provides a fast, cost effective way of controlling the appearance, distribution, delivery and archiving of all your system generated documents - from any business application. AutoFORM LaserNet Output Management produces finished graphical documents from standard ASCII reports, CSV files, XML and Windows print. LaserNet Output Management software then distributes finished electronic forms via network printers, email systems, network fax, SMS and e-business web portals.

AutoFORM LaserNet is used with ERP, Finance, Banking, HR, Logistics, Distribution, Retail, Accounting, CRM and e-commerce applications
